Falls Church, Virginia 22041

100-2

Support for US Operational Forces and  
Army Force and Materiel Developers

# THREAT analysis

---

The Army Intelligence Agency (AIA) provides intelligence users with short to long-range scientific and technological as well as general military intelligence assessments. Serving tactical and strategic planners, policy makers, and weapons developers, AIA's all-source threat support is provided through three unique yet mutually supporting centers -- the Foreign Science and Technology Center, the Intelligence and Threat Analysis Center, and the Missile and Space Intelligence Center.

# ITAC

INTELLIGENCE AND THREAT ANALYSIS CENTER  
WASHINGTON, D.C.

Produces foreign ground force threat projections, including long-range forecasting and trend analysis (doctrine, organization, operational, and tactical concepts). Assesses global, political and military developments and provides counterintelligence and terrorism analysis.

# FSTC

FOREIGN SCIENCE AND TECHNOLOGY CENTER  
CHARLOTTESVILLE, VIRGINIA

Explores foreign developments in the sciences, engineering, and applied technologies. Analyzes the current, projected, and assigned foreign ground force systems and related sciences and technologies. Implements the Army's foreign materiel exploitation program.

# MSIC

MISSILE AND SPACE INTELLIGENCE CENTER  
HUNTSVILLE, ALABAMA

Provides detailed, all-source analysis on foreign strategic air defense, tactical air defense, short-range ballistic and anti-tank guided missiles, and related technologies. Manages the Army development and acquisition of threat simulators.

## Supports:

- Force Modernization
- Operational Planning
- Materiel Acquisition
- Weapons Modeling
- Strategic Space Systems
- Technology Transfer
- Arms Control
- Operations Security

Information concerning AIA's product line is available by contacting AIA headquarters, located in Falls Church, Virginia at (703) 756-8615 or AUTOVON 289-8615.
